**Re: Public Records Act Request Regarding Any Written Records Regarding Damage to Caribou-Palermo Transmission Line from Wind or Fire in 2012, 2013 and/04 2014.  
CPUC Reference No.: PRA #19-32**

Dear Mr. Gold:

On January 17, 2019, you asked the California Public Utilities Commission (Commission) to provide you a copy of the following:

“Any records, letters, emails or written correspondence regarding damage to towers on the Caribou-Palermo transmission line from wind or fire in 2012, 2013 and/or 2014. Please include a letter from July 16, 2013 from Brian Cherry to the CPUC regarding this line. Also include any findings, fine or reports concerning this line. Also include any inspection records related to this line.”

Attached are records responsive to your request. We have no records concerning any fires on the Caribou-Palermo line from 2012-2014 other than this advice letter. Please see [here](#) for audits conducted on electric infrastructure dating back to 2010. This response closes this request.

Please refer to **PRA #19-32** in your communications with the Commission regarding the above-referenced matter.

Very truly yours,

/s/ Garrett Toy
